ACCEPTABLE USE OF ICT - POLICY

Introduction

The Kinross Wolaroi School ICT environment is provided for staff, students and visitors to help enable educational excellence by facilitating resource sharing, innovation and enhanced communication.

Staff and students are given access to the network with an individual account allowing Internet access. Access to the Internet is filtered and monitored, with usage recorded against the individual account. These facilities must be regarded as a privilege which may be withdrawn if misused.

General Policy overview (compliance guideline)

1. Use of computer/internet resources for educational purposes has priority over other (recreational) uses. Recreational use will be filtered so that educational use is given top-most priority
2. Individuals are expected to use the school ICT resources in a responsible and considerate manner. Each person will be held responsible and accountable for their actions
3. Appropriate language is expected in all communications including: email, Wiki, blogs, LMS, chat and web pages. Inappropriate content may be captured by the internet filter and highlighted to the Principal, Student Psychologist or General Duties Officer
4. No individual may deliberately or carelessly waste computer resources (e.g. unnecessary printing) or disadvantage other users (e.g. by monopolising equipment, network traffic etc.)
5. Consideration must be given to assure convenience to other computer users. e.g. use headphones to listen to sound or music; leave computers ready for the next user to log in; not leave programs running on computers when you leave; not leave rubbish or paper lying around computers; replace furniture to normal positions when you leave

Computer Hardware and Software

Computer facilities are expensive and care must to be taken to ensure availability for all. It is important computer equipment is treated with respect and care.

Staff, Students and visitors must not:

- Do anything likely to cause damage to equipment, whether deliberately or carelessly, including (but not limited to):
  - Steal, damage, deface any equipment
  - Interfere with networking equipment such as Access Points, switches, hubs and network cables
  - Eat or drink near any School's owned computer resources

- Staff, Students and visitors must not, without permission:
  - Attempt to repair equipment
  - Unplug cables or move equipment
  - Remove any covers or panels or disassemble any equipment
  - Disable the operation of any equipment
Computer operating systems and other software must be set up properly for computers to be useful. Staff, Students and visitors must not:

- Change computer settings (including screen savers, wallpapers, desktops, menus, standard document settings etc.) without permission
- Bring or download unauthorised programs, including games, to the school or run them on school computers. **Online internet games are banned during school hours.** For boarders, the House Maser (or delegate) has discretion to allow on-line internet games.
- Copy any copyrighted software to or from any computer, or duplicate such software.

**Kinross Wolaroi School Computer Network Access and Use**

Network accounts are to be used only by the authorised owner of the account. If you find a computer logged in, you should do nothing in that account except log-out. It is the responsibility of students to make backup copies of their work. The school will exercise due care with backups but will not be held responsible for lost data.

Throughout the school year staff and students will be responsible to keep their folders on the network in a clean, organised, uncluttered manner. At the end of year 6 and year 12, student content will be removed. Consequently students have a responsibility to take a copy of their work before the end of year 6 and year 12. There is 5GB storage quota on the LMS.

It is very important if you are part of the iPad program to ensure you back-up the educational data that is on your iPad. This may be achieved by backing up to the iCloud, your personal computer or Laptop. Boarding students have permission to back up to a school Laptop or PC in their respective boarding house.
Password Management

1. The Network manager, in consultation with the school’s ICT Coordinator, shall help guide all staff, secondary students and visitors to comply with the following password management principles:

<table>
<thead>
<tr>
<th>Area</th>
<th>Minimum Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>Length of password</td>
<td>6 characters</td>
</tr>
<tr>
<td>Structure – Mix of Characters</td>
<td>At least one alphabetic and at least one non-</td>
</tr>
<tr>
<td></td>
<td>alphabetic character</td>
</tr>
<tr>
<td>Number of unsuccessful login attempts before the</td>
<td>5 times</td>
</tr>
<tr>
<td>username is made inaccessible automatically (locked)</td>
<td></td>
</tr>
<tr>
<td>Duration of lockout period</td>
<td>30 minutes – or notify the Network Manager to</td>
</tr>
<tr>
<td></td>
<td>reset the password</td>
</tr>
<tr>
<td>Period after which a password must be changed</td>
<td>180 days (every 6 months) - Users also have the</td>
</tr>
<tr>
<td></td>
<td>ability to change their own passwords at any time</td>
</tr>
<tr>
<td>Reusability of old passwords</td>
<td>A user will not be allowed to use a password they</td>
</tr>
<tr>
<td></td>
<td>have used before within the last 12 months</td>
</tr>
</tbody>
</table>

2. A person issued with a password has a responsibility to change it immediately after he/she:
   a. Has been issued with the initial default password;
   b. Has used the same password for more than six months;
   c. Is advised by IT manager or ICT staff to change it;
   d. Has reason to suspect the password has been observed or compromised.

3. A person must not:
   a. Share the password with anyone
   b. Write the password down in an insecure location
   c. Ask another user for the use of their password for ANY reason. If access to their files is required then a request to the Network manager must be made.

4. A breach of points 2 or 3 of this policy may result in the suspension of the user account.

5. In the case of infants and lower primary students, the password assigned to the students’ accounts will be recorded in a secure location by their classroom teacher and accessed wherever it is needed. In these situations, small cards may be produced to help infants and lower primary students with the use of their username and passwords. These cards will be kept by their classroom teacher in a secure location.
Computer and Network Use

Staff, Students and visitors must not:

- Attempt to log into the network with any user name or password that is not their own, or change any other person’s password.
- Reveal their password to anyone except the system administrator. With exception of Prep School students who may reveal their password to classroom teachers, if necessary.
- Use or possess any program designed to reduce network security. Refer Use of Proxies section on the next page.
- Enter any other person’s home directory or do anything whatsoever to any other person’s files.
- Attempt to alter any person’s including their own access rights.
- Store the following types of files in their home directory, without permission from the IT Manager:
  - Program files (EXE, COM, BIN etc.)
  - Music, Picture and Video files, unless they are specifically required by a subject and do not breach copyright laws.
  - Inappropriate material – pictures or text including inappropriate filenames
  - Copyrighted material

Use of Personal Devices on the School Network (BYOD)

With an increasing number of staff, students and visitors using to their own computers on the school’s network, it has become necessary to outline the requirements for Bring Your Own Device (BYOD).

1. Personal devices must have appropriate anti-virus and anti-spyware software to ensure the safety of their files and the school’s network. There are many free products available. The Network Manager and Network Technician will be available to advise, guide and assist.

2. Many devices: (laptops, iPads, tablets, phones) come standard with wireless access cards and hardware. Publicly available internet providers such as Bigpond or Optus will not necessarily have the security or filtering software that is available via the school’s network. In such cases, the school will not take responsibility for any material that is accessed and stored on those devices. This outside Internet access entails extra expense for students and parents.

3. Some programs allow the sharing of audio and video files.
   a. The sharing of music files across the school’s network raises serious copyright issues for both the school and the students involved and therefore the sharing of files is not condoned by the school and is discouraged.
   b. The sharing of video content is allowable via the Schools DVC or commander system. Sharing video content by other means could result in copyright breach.

4. BYOD devices must not have a bridge configured on its’ Network adapters
5. Connection to the school’s wireless network is granted once the computer details are provided to the school’s Network Manager. Specifically, the person’s name, computer name and the MAC address.

**Printing of work**

In the interests of our environment, the use of printing is to be minimised at all times by: print previewing, editing on screen rather than on printouts and spell-checking before printing.

Students must not load paper into printers without permission.

| Paper that is pre-used, torn, creased, damp, irregularly shaped or sized should never be used in any printer; laser or ink jet. |

Any damage resulting from inappropriate use may be charged to the account of the responsible person.

Students receive an allocation of $4 per month for printing. Any unused amount is rolled over to the next month. As of Jan 2013 printing costs are as follows: 20c/page for B/W and 60c/page for colour.

**Internet Access and Usage**

Internet access is expensive and has been provided to assist students' education. Students must use it only with permission, and not in any unauthorised way. It is not intended for entertainment, except for boarding students during their downtime when authorised by the House Master (or delegate).

Since the Internet is an unsupervised environment, the school has a responsibility to ensure that, as far as possible, material obtained from the Internet is not offensive or inappropriate. To this end, filtering software has been placed on the school's network so that it monitors and records details about Internet usage. All web access by students is tracked and logs are kept by the Network Manager.

Each day student is allocated 5 Gigabytes of data allowance each month. Each Boarding student is allocated 10 Gigabytes of data allowance each month. It is the responsibility of the student to use this allocation appropriately.

This allowance is reset each month. A student may elect to renew their quota by agreeing to additional charge on their account. As at January 2013 this charge is $10 for each occurrence.

**Email**

Electronic mail is a valuable tool for personal and official communication both within the school’s network and on the Internet.
Staff must use their school email for all school related matters including (but not limited to): contact with parents; peers; professional associations; others for the purposes of improving educational outcomes for students. Staff members are able to access other email services for private (non-school) matters on a limited basis in their own time. School related email communication is priority. Students are restricted to school provided email only.

The following points should be noted:

- Use appropriate language and be polite in your messages. Do not be insulting, abusive, swear or use vulgarities.
- Never write hate mail, chain letters, harassment, discriminatory remarks and other antisocial communication. No messages should contain obscene comments, threats, sexually explicit material or expressions of bigotry or hate.
- Do not reveal your personal home address or the phone numbers of staff or students without consent.

Note that email is not private. System administrators have access to all files including mail. Messages relating to illegal or inappropriate activities may be reported.

Staff, Students and visitors will not:

- send offensive or inappropriate mail
- send email with large attachments, from January 2013 any mail with attachment >14MB is blocked
- send unsolicited mail to multiple recipients ("spam")

**On-line Chat lines (IRC, MIRC, ICQ etc.)**

Online chat may refer to any kind of communication over the Internet, that offers a real-time direct transmission of text-based messages from sender to receiver. Real-time chat programs (MIRC, ICQ) are not to be used by students without approval. iMessage is an allowed exception amongst students in the iPad program out of school time or with permission from the classroom teacher.

**World Wide Web**

The World Wide Web is a vast source of material of all sorts of quality and content. The school will exercise all care in protecting students from offensive material, but the final responsibility must lie with students in not actively seeking out such material. It is conceivable that, especially for senior students, information is required for curriculum purposes that may appear to contravene the following conditions, i.e. sites will be blocked. **In such cases, it is the responsibility of students and teachers to negotiate with Network Manager the need to access such sites.**
ACCEPABLE USE OF ICT - POLICY

Students will not deliberately enter or remain in any site that has any of the following content:

- Nudity, obscene language or sexual discussion intended to provoke a sexual response
- Gambling
- Dating
- Social media during school hours without approval
- Violence or racism or discrimination against minority groups
- Information on, or encouragement to commit any crime

Unless part of an approved classroom lesson and supervised by the teacher. If students encounter any such site, they must immediately turn off the computer monitor (not the computer itself) and notify a teacher.

Acceptable Social Media

Access to social media such as: Podcasts, WiKi’s, Blogs, content communities (YouTube) are permitted if it is for educational use. Boarding students have limited access to social networking sites and the activity on these sites is filtered and monitored.

Unacceptable Social Media

The following types of social media are not permitted for students:

- micro blogging (twitter),
- virtual game worlds (World of Warcraft),
- Social networking (Bebo, Facebook and MySpace), Social Networking is blocked for day students.

Proxies

The use of proxy servers (proxies) or similar methods to bypass the school’s content filtering software is considered a major breach of the acceptable user policy and as such will result in the immediate removal of the student’s network and internet access for a period of at least ONE week. This applies to ALL students whether they are in Year 1 or Year 12. This can and will affect the student’s ability to complete set work including assessment tasks that are dependent on Internet Access. It is therefore up to the student to remain responsible and accountable for their actions. Letters stating this breach will be sent home to the student’s parent or guardian.

Torrents

Torrents are used to enable downloading, distributing and sharing large amounts of data over the internet. Use of torrents is not permitted on the Kinross Wolaroi Network.
Possible penalties applied to breaches of this policy

More than one penalty may apply for a given offence. Serious or repeated offences will result in stronger penalties.

1. Exclusion from lunchtime computer use
2. Temporary ban on using computers
3. Removal of email privileges
4. Removal of internet access privileges
5. Removal of home directory and network access (with consequent inability to satisfactorily complete unit requirements of the subject)
6. Detention
7. Paying for replacement equipment
8. Removal from classes where computer use is involved
9. Suspension from School
Acceptable Use of ICT Policy – Agreement and Sign off

Before you may use computer facilities at Kinross Wolaroi School, you must agree to the terms of this policy either by either:
   a) Signing this contract which binds you to the conditions of this policy.
   b) Record your agreement to the terms of this Policy electronically via the electronic Survey which identifies you by your login credentials and records your user account

Your name: ________________________________

Academic Year (if applicable): ____________

Tutor House (if applicable): ________________

I have read the Kinross Wolaroi School Acceptable Use of ICT Policy and agree to abide by the guidelines and conditions described in it.
